James Kipp Recreation Area
Visitor Survey

Introduction

In order for the Bureau of Land Management (BLM) to comply with the Government Performance and Results Act (GPRA), and better meet the needs of the public; a visitor satisfaction survey was conducted at 17 BLM recreation sites in 11 states during fiscal year 2006 (FY06). The survey was developed to measure each site’s performance related to BLM GPRA Goal 3.1 - *Provide for a quality recreation experience, including access, and enjoyment of natural and cultural resources on DOI managed and partnered lands and waters;* and Goal 3.2 - *Provide for and receive fair value in recreation.* The information collected during the survey will also help the BLM better serve the public. The survey collected visitor satisfaction data regarding visitor information (i.e., use of maps, signs, brochures), developed facilities, managing recreation use, resource management, BLM staff and customer service, and educational and interpretive materials.

The results of the visitor satisfaction survey conducted at James Kipp Recreation Area are summarized in this data report. A description of the research methods and limitations can be found on the next page. Below (left) is a graph summarizing visitor opinions of the “overall quality of recreation experience.” The satisfaction measure next to this graph is a combined percentage of “good” and “very good” responses. This is the primary performance measure for GPRA Goal 3.1 and should be used for reporting performance for this goal (NOTE: the satisfaction measure may not equal the sum of “very good” and “good” percentages due to rounding).

The response rate for this site survey was 100%. The graph and satisfaction measure summarizing visitor opinions of the “value for fee paid”, which is the primary performance measure for GPRA Goal 3.2, can be found on page 9.

FY06: 194 respondents

FY06 GPRA Satisfaction Measure

Percentage of site visitors satisfied overall with appropriate facilities, services, and recreational opportunities:

95%

Satisfaction measure: 95%
Average evaluation score: 4.6

Report prepared by the University of Idaho Park Studies Unit for the Bureau of Land Management, US Department of the Interior
Understanding the Results

Inside this report are graphs that illustrate the survey results. The report contains 8 categories of data regarding BLM amenities, staff, and services plus selected demographics. Within these categories are graphs for each indicator evaluated by site visitors. For example, the Visitor Information category includes indicators such as “providing useful maps and brochures,” “adequate signs on site for direction,” and so forth. In each category there is a graph entitled “Everything Considered” this graph is the basis for determining visitor satisfaction for each category and GPRA reporting numbers.

Each graph includes the following information:

- The number of visitor responses for the indicator;
- The percentage of responses which were "very good," "good," "average," "poor," and "very poor;"
- A "satisfaction measure" that combines the percentage of total responses which were "very good" or "good;", and
- An average evaluation score (mean score) based on the following values: very poor= 1, poor= 2, average= 3, good= 4, very good= 5.

\begin{center}
\begin{tabular}{|c|c|c|c|c|}
\hline
Very & 1 & 2 & 3 & 4 & 5 \\
Poor & & & & & \hline
\end{tabular}
\end{center}

- The higher the average evaluation score, the more positive the visitor response
- Graph percentages may not equal 100% due to rounding

Research Methods

Surveys were distributed to a random sample of visitors at this site during a selected period in FY06. The survey response rate is described on the first page of this report, meaning that 100% of those randomly sampled responded to the survey. The data reflect visitor opinions about this site's facilities, management, services, educational opportunities, and fees during the survey period. Visitor activities and selected demographics were also captured. A representative sample of the general visitor population were surveyed at selected locations. The results do not necessarily apply to visitors during other times of the year, or visitors who did not visit the survey locations on site.

Returned surveys were electronically scanned and the data analyzed. Frequency distributions were calculated for each indicator and category.

All percentage calculations were rounded to the nearest percent.

The survey response rate is described on the first page of this report. The sample size (n) varies from figure to figure, depending on the number of responses.

Caution is advised when interpreting any data with a sample size of less than 30. In such cases, the word “CAUTION!” is included in the graph. This report excludes any indicator with less than 10 responses.

For most indicators, the survey data are expected to be accurate with in ± 6% with 95% confidence. This means that if different samples had been drawn, the results would have been similar (±6%) 95 out of 100 times.

For more information about this survey, contact Jennifer Hoger Russell, BLM Survey Project Coordinator at the University of Idaho Park Studies Unit (208) 885-4806

National Landscape Conservation System
Site Specific Goal

"As a National Monument, this area's designated purpose is to provide visitors with the opportunity of an outdoor experience including the sights and sounds of nature. To experience and see a part of the Lewis and Clark National Historic Trail, provide the opportunity to camp in the Upper Missouri River Breaks NM and National Wild and Scenic River. Based on what you experienced at this site during your visit, do you think the BLM is achieving this goal?"

Is the BLM achieving the site specific goal?
