Timpanogos Cave
National Monument
Visitor Study
Summer 2005
Marc Manni is a National Park Service VSP Research Assistant, and Dr. Steven Hollenhorst is the Director of the Park Studies Unit, Department of Conservation Social Sciences, University of Idaho. We thank Pixie Siebe and the staff and volunteers of Timpanogos Cave National Monument for their assistance with this study. The VSP acknowledges David Vollmer for his technical assistance. This study was partially funded by Recreation Fee Program.
This report describes the results of a visitor study at Timpanogos Cave National Monument (NM) during July 8-16, 2005. A total of 460 questionnaires were distributed to visitor groups. Of those, 286 questionnaires were returned resulting in a 62% response rate. Fifteen percent of visitors chose to use the online option to complete the questionnaire.

This report profiles Timpanogos Cave NM visitors. Most results are presented in graphs and frequency tables. Summaries of visitor comments are included in the report and complete comments are included in the Visitor Comments Appendix.

Fifty-two percent of visitor groups were groups of 5 or more, 27% were in groups of three or four, and 17% were in groups of two. Sixty-nine percent of the visitor groups were family groups. Forty-two percent of visitors were ages 21-50 years and 39% were ages 15 or younger.

United States visitors were from Utah (64%), California (6%), and 34 other states. International visitors, comprising 4% of the total visitation, were from Japan (23%), Spain (17%), and 9 other countries.

Fifty-five percent of visitors visited Timpanogos Cave NM for the first time in their lifetime and 88% visited for the first time in the past 12 months. Thirty-two percent of visitors (16 years or older) had some college and 30% held a bachelor’s degree.

Prior to this visit, visitor groups most often obtained information about Timpanogos Cave NM through previous visits (65%) and friends/relatives/word of mouth (48%). Eight percent of visitor groups did not obtain any information about the park before their visit. Most groups (88%) received the information they needed about the park.

Thirty-four percent of visitor groups’ primary reason for traveling to the Timpanogos Cave NM area (within 50 miles) was to visit Timpanogos Cave NM. On this visit, the most common activities were taking the cave tour (85%), hiking/walking (63%), and visiting visitor center (47%).

In regard to use, importance, and quality of information services and facilities, it is important to note the number of visitor groups that responded to each question. The most used services/facilities by the 263 visitor groups included cave tour (85%), monument brochure/map (56%), and trailside interpretive signs (51%). The services/facilities that received the highest combined proportions of “extremely important” and “very important” ratings included cave tour (95%, N=221) and monument website (67%, N=65). The services/facilities that received the highest combined proportions of “very good” and “good” ratings included cave tour (90%, N=217) and monument brochure/map (89%, N=139).

In regard to use, importance, and quality of visitor services and facilities, it is important to note the number of visitor groups that responded to each question. The most used services/facilities by the 279 visitor groups included parking areas (82%), visitor center restrooms (81%), and trail to cave (81%). The services/facilities that received the highest combined proportions of “extremely important” and “very important” ratings included trail to cave (97%, N=220), visitor center restrooms (96%, N=223), and parking areas (93%, N=224). The services/facilities that received the highest combined proportions of “very good” and “good” ratings included trail to cave (92%, N=220), assistance from monument staff (88%, N=114), and Swinging Bridge picnic area (78%, N=36).

Most visitor groups (93%) rated the overall quality of services, facilities, and recreational opportunities at Timpanogos Cave NM as “very good” or “good.” No visitor groups rated the overall quality as “very poor” or “poor.”

INTRODUCTION

This report describes the results of a visitor study at Timpanogos Cave NM. This visitor study was conducted from July 8-16, 2005 by the National Park Service (NPS) Visitor Services Project (VSP), a part of the Park Studies Unit (PSU) at the University of Idaho.

Organization of the report

The report is organized into three sections.

Section 1: Methods. This section discusses the procedures, limitations, and special conditions that may affect the results of the study.

Section 2: Results. This section provides summary information for each question in the questionnaire and includes a summary of visitor comments. The presentation of the results of this study does not follow the same order of questions in the questionnaire. Instead, the results are presented in the following order:

- Demographics
- Information Prior to Visit
- Information During Visit
- Ratings of the Park’s Services, Facilities, Elements, Attributes, Resources, and Value for Fee Paid
- Expenditures (only presented if the questionnaire included expenditure questions)
- Information about Future Preferences
- Overall Quality
- Visitor Comments

Section 3: Appendices

Appendix 1: The Questionnaire contains a copy of the original questionnaire distributed to groups.

Appendix 2: Additional Analysis contains a list of options for cross references and cross comparisons. These comparisons can be analyzed within park or between parks. Results of additional analyses are not included in this report as they may only be requested after this study is published.

Appendix 3: Decision rules for checking non-response bias

Appendix 4: Visitor Services Project Publications contains a complete list of publications by the PSU. Copies of these reports can be obtained by contacting PSU office or visiting the website: http://www.psu.uidaho.edu/vsp/reports.htm.

Visitor Comments Appendix: A separate appendix contains visitor responses to open-ended questions. It is bound separately from this report due to its size.
Presentation of the results

Most results are represented in the form of graphs (see example below) with some narrative text. Results may also be displayed as scatter plots, pie charts, or tables when applicable.

SAMPLE ONLY

1: The figure title describes the graph’s information.
2: Listed above the graph, the “N” shows the number of individuals or visitor groups responding to the question. If “N” is less than 30, CAUTION! on the graph shows the results may be unreliable. * appears when total percentages do not equal 100 due to rounding.
** appears when total percentages do not equal 100 because visitors could select more than one answer choice.
3: Vertical information describes the response categories.
4: Horizontal information shows the number or proportions of responses in each category.
5: In most graphs, percentages provide additional information.
METHODS

Survey Design

Sample size and sampling plan

All VSP questionnaires follow design principles outlined in Don A. Dillman's book *Mail and Internet Surveys: The Tailored Design Method* (2000). Based on this methodology, the sample size was calculated based on park visitation statistics of previous years. To minimize coverage error, the sample size was also determined to provide adequate information about specific park sites if requested.

Interviews were conducted with visitor groups, and 460 questionnaires were distributed to a random sample of visitor groups who arrived at Timpanogos Cave NM during the period from July 8-16, 2005. Visitors could complete either the paper version of the questionnaire or the online version. The online option did not change the sample size or sampling plan, but provided the visitor with another option for completing the survey.

Table 1 presents the locations and numbers of questionnaires distributed at each location. These locations were selected based on park visitation statistics and advice from park staff.

Table 1: Questionnaire distribution location

N=number of questionnaires distributed; percentage does not equal 100 due to rounding.

Questionnaire design

The Timpanogos Cave NM questionnaire was developed at a workshop held with park staff to design and prioritize the questions. Some of the questions were comparable with VSP studies conducted at other parks while others were customized for Timpanogos Cave NM. Many questions asked visitors to choose answers from a list that was provided, often with an open-ended option, while others were completely open-ended.

The questionnaire was presented in two formats—traditional paper booklet and online which was compatible with most common web browsers for both PC and Macintosh computers. The online version of the questionnaire did not allow visitors to “skip” a question before proceeding to the next question and to a certain degree did not allow the participant to
answer the question “incorrectly”. The online survey password was a one-time use, computer generated password unique to each participant. Unique passwords were used to prevent unauthorized access to a participant’s survey. Participants could log in and out of their survey by selecting the “save and return later” option. When the participant finished the survey and selected the “completed and exit” option, the survey was “locked” and future access was not possible.

No pilot study was conducted to test the Timpanogos Cave NM questionnaire. However, all questions followed the OMB guidelines and/or were used in previous surveys. Thus, the clarity and consistency of the survey instrument have been tested and proven. For the first time, the VSP offered an online option for completing the survey instrument.

**Survey procedure**

Visitor groups were greeted, briefly introduced to the purpose of the study, and asked to participate. If visitors agreed, an interview lasting approximately two-minutes was used to determine group size, group type, and the age of the group member (at least 16 years of age) who would complete the questionnaire. These individuals were then asked for their names, addresses, and telephone numbers in order to mail them a reminder/thank you postcard and follow-ups, if needed. All visitor groups were given a questionnaire containing a postcard with a unique user ID and password, the Internet address, and directions for completing the survey online. Visitors were asked to complete the survey after their visit, and then return the questionnaire by mail or complete the survey online. The questionnaires were pre-addressed and affixed with a U.S. First Class postage stamp.

Two weeks following the survey, a reminder/thank you postcard was mailed to all participants. Replacement questionnaires and follow-up letters were mailed to participants who had not returned their questionnaires four weeks after the survey. Seven weeks after the survey, a second round of replacement questionnaires and follow-up letters were mailed to visitors who still had not completed their survey. Follow-up letters contained another unique password that differentiated between mailing waves and eliminated duplicate submissions.
Data Analysis

Returned questionnaires were coded and the information was entered into a computer using standard statistical software packages—Statistical Package for the Social Sciences (SPSS) and Sequel Server (SQL). Frequency distribution and cross-tabulations were calculated for the coded data and responses to open-ended questions were categorized and summarized. The online version was entered by the visitor, while the paper version was entered by two independent data entry staff and validated by a third staff member.

Limitations

Like all surveys, this study has limitations that should be considered when interpreting the results.

1. This study used a self-administered questionnaire. In addition, the respondents filled out the questionnaire after the visit, which may have resulted in poor recall. Thus, it is not possible to know whether visitor responses reflect actual behavior.

2. Visitors were given more than one option to complete the survey, which may have affected the response rate.

3. The data reflect visitor use patterns of visitors to the selected sites during the study period of July 8-16, 2005. The results present a ‘snapshot-in-time’ and do not necessarily apply to visitors during other times of the year.

4. Caution is advised when interpreting any data with a sample size of less than 30, as the results may be unreliable. Whenever the sample size is less than 30, the word “CAUTION!” is included in the graph, figure, table, or text.

5. Occasionally, there may be inconsistencies in the results. Inconsistencies arise from missing data or incorrect answers (due to misunderstood directions, carelessness, or inaccurate memory of the respondent). Therefore, refer to both the percentage and N (number of individuals or visitor groups) when interpreting the results.

Special Conditions

During the survey distribution period the weather was sunny with extremely high temperatures (in the 100s) during the day. The monument experienced a high volume of visitors so many were unable to participate in the cave tour due to maximum tour-size limitations.
Checking Non-response Bias

At Timpanogos Cave NM, 488 visitor groups were contacted and 460 of these groups (94%) accepted the questionnaire. Questionnaires were completed and returned by 286 visitor groups, resulting in a 62% response rate for this study. Of the 286 questionnaires completed, 43 were completed online resulting in a 15% online completion rate. Age of the group member who actually filled out the questionnaire and group size were the two variables used for checking non-response bias.

The results in Table 2 show that there are no significant differences between respondent and non-respondent ages and group sizes. Therefore, the non-response bias was judged to be insignificant and the data of this study is a good representation of a larger population of visitors to Timpanogos Cave NM. See Appendix 3 for more details of the non-response bias checking procedure.

<table>

<td></td>
</tr>
<tr>
<td>Age</td>
</tr>
<tr>
<td>Group size</td>
</tr>
</tbody>
</table>

The results in Table 3 show that there are no significant differences between online and paper version respondent ages and group sizes. Therefore, there are no significant differences between online and paper respondents.

RESULTS

Demographics

Visitor age

Question 17
For you and your personal group, what is your current age?

Note: Response was limited to seven members of each personal group.

Results
- Visitor ages ranged from 1 to 95 years old.
- 42% were in the 21-50 age group.
- 39% of visitors were 15 years or younger (see Figure 1).

Visitor level of education

Question 19
For you and your personal group (age 16 and over), what is your highest level of education?

Note: Response was limited to seven members of each personal group.

Results
- 32% of visitors had some college (see Figure 2).
- 30% held a bachelor’s degree.

* total percentages do not equal 100 due to rounding

** total percentages do not equal 100 because visitors could select more than one answer
Preferred languages for speaking and writing

Question 20a
Is English the primary language that you and your group prefer to speak and write?

Results
- 93% percent of visitor groups preferred to speak and write English (see Figure 3).

Figure 3: English as primary language

Question 20b
If NO, what one language do you and your group prefer to for speak and write?

Results (Interpret with CAUTION!)
- Preferred languages mentioned by visitor groups (N=16) who do not use English as their primary language were:
  - Arabic
  - Chinese
  - Dutch
  - Finnish
  - French
  - Japanese
  - Korean
  - Spanish

Services visitors would like translated into other languages

Question 20c
What services in the monument would you like to have provided in languages other than English?

Results (Interpret with CAUTION!)
- Monument services that visitor groups (N=8) would like provided in languages other than English were:
  - Cave guide
  - Maps
  - Everything
  - Pamphlets
  - Guided tours
  - Warning signs
  - History

Question 20d
Which language?

Results (Interpret with CAUTION!)
- Preferred languages mentioned by visitor groups (N=10) were:
  - Arabic
  - Japanese
  - Dutch
  - Norwegian
  - German
  - Spanish
  - Italian

* total percentages do not equal 100 due to rounding
** total percentages do not equal 100 because visitors could select more than one answer
United States visitors by state of residence

Question 17
For you and your personal group, what is your state of residence?

Note: Response was limited to seven members of each personal group.

Results
- U.S. visitors comprised 96% of visitors to park (see Table 4 and Map 1).
- 64% of visitors came from Utah.
- 6% came from California.
- 4% came from Idaho.
- Smaller proportions came from 33 other states.

International visitors by country of residence

Question 17
For you and your personal group, what is your country of residence?

Note: Response was limited to seven members of each personal group.

Results
- As shown in Table 5, international visitors comprised 4% of total visitation to Timpanogos Cave NM.
- 23% of international visitors came from Japan.
- 17% came from Spain.
- 13% came from Costa Rica.
- 13% came from France.
- 11% came from Canada.
- Smaller proportions came from 6 other countries.

Visitors with disabilities/impairments

Question 18a
Does anyone in your group have any disabilities/impairments that affected their visit to Timpanogos Cave NM?

Results
- 6% of visitor groups had members with disabilities or impairments that affected their park experience (see Figure 4).

![Figure 4: Visitors with disabilities/impairments](image)

Question 18b
If YES, what kind of disability/impairment?

Results (Interpret with CAUTION!)
- As shown in Figure 5, not enough visitor groups responded to this question in order to provide reliable data.
- 26% of visitor groups had “other” types of disabilities which included:
  - Asthma
  - High blood pressure
  - Multiple sclerosis
  - Vertigo
  - Did not speak English

![Figure 5: Visitors with disabilities/impairments](image)

Question 18c
Because of the disability/impairment did you encounter any access or service problems during this visit to Timpanogos Cave NM?

Results (Interpret with CAUTION!)
- As shown in Figure 6, not enough visitor groups responded to this question in order to provide reliable data.

![Figure 6: Visitors with disabilities/impairments](image)

Question 18d
If YES, what were the problems?

Results (Interpret with CAUTION!)
- The access or service problem that visitors with disabilities/impairments (N=1) encountered was width of trail.

* total percentages do not equal 100 due to rounding
** total percentages do not equal 100 because visitors could select more than one answer
Number of visits to Timpanogos Cave NM in the past 12 months

Question 17
How many times have you visited the monument in the past 12 months (including this visit)?

Note: Response was limited to seven members of each personal group.

Results
- 88% of visitors visited Timpanogos Cave NM once in the past 12 months (see Figure 7).

![Bar Graph](image1.png)

Figure 7: Number of visits to the monument in past 12 months

Number of visits to Timpanogos Cave NM in lifetime

Question 17
How many times have you visited the monument in your lifetime (including this visit)?

Note: Response was limited to seven members of each personal group.

Results
- 55% of visitors visited Timpanogos Cave NM for the first time in their lifetime (see Figure 8).
- 30% visited the park two or three times.
- 15% visited the park four or more times.

![Bar Graph](image2.png)

Figure 8: Number of visits to the monument in visitor lifetime

* total percentages do not equal 100 due to rounding
** total percentages do not equal 100 because visitors could select more than one answer
Visitor group size

Question 16a
How many people in your personal group?

Results
- Visitor group sizes ranged from one person to 40 people.
- 36% of visitor groups had six or more people (see Figure 9).
- 32% had four or five people.
- 28% had two or three people.

Figure 9: Visitor group size

Visitor group type

Question 14
What kind of personal group (not tour/school/business group) were you with?

Results
- 69% of visitor groups were made up of family members (see Figure 10).
- 14% were with family & friends.
- 3% were with “other” group types which included:
  - Church group
  - Church youth group
  - Date

Figure 10: Visitor group type

* total percentages do not equal 100 due to rounding
** total percentages do not equal 100 because visitors could select more than one answer
Question 13a
Were you and your personal group with a guided tour group?

Results
- 17% of visitor groups were traveling with a guided tour group (see Figure 11).

![Guided tour group](image)

Figure 11: Visitors traveling with a guided tour group

Question 13b
Were you and your personal group with a school/educational group?

Results
- 2% of visitor groups were traveling with a school/educational group (see Figure 12).

![School/educational group](image)

Figure 12: Visitors traveling with a school/educational group

Question 13c
Were you and your personal group with a family reunion group?

Results
- 12% of visitor groups were with a family reunion group (see Figure 13).

![Family reunion group](image)

Figure 13: Visitors with a family reunion group

* total percentages do not equal 100 due to rounding
** total percentages do not equal 100 because visitors could select more than one answer
Question 13d
Were you and your personal group with a corporate group?

Results
- No visitor groups were traveling with a corporate group (see Figure 14).

![Figure 14: Visitors traveling with a corporate group](image)

Question 13e
Were you and your personal group with a scouts/youth group?

Results
- 2% of visitor groups were traveling with a scouts/youth group (see Figure 15).

![Figure 15: Visitors traveling with a scouts/youth group](image)

Question 13f
Were you and your personal group with a church group?

Results
- 3% of visitor groups were traveling with a church group (see Figure 16).

![Figure 16: Visitors traveling with a church group](image)

* total percentages do not equal 100 due to rounding
** total percentages do not equal 100 because visitors could select more than one answer
Information Prior to Visit

Information sources prior to visit

Question 1a
Prior to this visit, how did you and your group obtain information about Timpanogos Cave NM?

Results

- 8% of visitor groups did not obtain any information about the park prior to their visit (see Figure 17).

- As shown in Figure 18, of those who obtained some information prior to their visit (92%), the most common sources of information included:
  - 65% Previous visits
  - 48% Friends/relatives/word of mouth
  - 19% Monument website
  - 15% Walking/driving/biking saw signs

- 4% of visitor groups used "other" sources of information which included:
  - Live in area
  - BYU Geology class
  - School programs
  - Museum exhibit at Utah State University

Figure 17: Visitors who obtained information about park prior to this visit

Figure 18: Sources of information used by visitor groups prior to this visit

* total percentages do not equal 100 due to rounding
** total percentages do not equal 100 because visitors could select more than one answer
Question 1b
From the sources you used prior to this visit, did you and your group obtain the type of information about the monument that you needed?

Results
- 88% of visitor groups obtained information they needed to prepare for this trip to Timpanogos Cave NM (see Figure 19).

![Bar chart showing 88% Yes, 6% No, 6% Not sure for Obtained needed information.]

Figure 19: Visitor groups who obtained needed information prior to this visit to Timpanogos Cave NM

Question 1c
If NO, what type information did you and your group need that was not available?

Results (Interpret with CAUTION!)
- Additional information that visitor groups (N=16) needed but was not available through these sources included:
  - Hours of operation
  - Tour times and fees
  - Ticket/reservation requirements for tour
  - Length of wait before tour
  - Clothing requirements for cave
  - Specific directions to the monument
  - Difficulty level of hike to cave

* total percentages do not equal 100 due to rounding
** total percentages do not equal 100 because visitors could select more than one answer
Visitor awareness of management by National Park Service

Question 2a
Prior to this visit, were you and your group aware of the difference between a state park and a national park?

Results
- 72% of visitor groups were aware of the difference between a state park and a national park (see Figure 20).

![Figure 20: Awareness of difference between a state park and a national park](image1)

Question 2b
Prior to this visit, were you and your group aware of the difference between a national forest and a national park?

Results
- 61% of visitor groups were aware of the difference between a national forest and a national park (see Figure 21).

![Figure 21: Awareness of difference between a national forest and a national park](image2)

Question 2c
Prior to this visit, were you and your group aware that Timpanogos Cave NM is a unit of the National Park System?

Results
- 50% of visitor groups were aware that the monument is a unit of the National Park System (see Figure 22).

![Figure 22: Awareness that Timpanogos Cave NM is a unit of the National Park System](image3)

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Information During Visit

Primary reason for visiting Timpanogos Cave NM area

Question 3
On this trip, what was the primary reason that you and your group visited the Timpanogos Cave NM area (within 50 miles of monument)?

Results
- 40% of visitor groups were residents of the local area (see Figure 23).
- Of those who were not residents (60%), primary reasons for visiting the Timpanogos Cave NM area included:
  - 34% Visit the monument (see Figure 24)
  - 29% Visit friends/relatives in the area
- 10% of visitors had “other” primary reasons for visiting which included:
  - Exercise
  - Camping
  - Picnicking
  - Hiking the trail
  - Driving through area
  - Vacation home in area
  - Barbershop singing in area

How Timpanogos Cave NM fit into travel plans

Question 5
How did this visit to Timpanogos Cave NM fit in to your travel plans?

Results
- 54% of visitor groups reported that the monument was their primary destination (see Figure 25).
- 32% reported monument was one of several destinations.

* total percentages do not equal 100 due to rounding
** total percentages do not equal 100 because visitors could select more than one answer
Adequacy of directional signs

Question 4a

Were the signs directing you to Timpanogos Cave NM adequate?

Results

**Signs on interstates**

- 73% of visitor groups felt the directional signs on interstates were adequate (see Figure 26).

![Figure 26: Adequacy of directional signs on interstates](image)

**Signs on state highways**

- 75% of visitor groups felt the directional signs on state highways were adequate (see Figure 27).

![Figure 27: Adequacy of directional signs on state highways](image)

**Signs on city streets**

- 61% of visitor groups felt the directional signs on city streets were adequate (see Figure 28).

![Figure 28: Adequacy of directional signs on city streets](image)

* total percentages do not equal 100 due to rounding

** total percentages do not equal 100 because visitors could select more than one answer
Question 4b
Did you and your group have any difficulty locating the monument?

Results
- 6% of visitor groups had difficulty in locating the monument (see Figure 29).

Figure 29: Difficulty locating the monument

Question 4c
If YES, please explain the problem.

Results (Interpret with CAUTION!)
- The difficulties visitor groups (N=15) experienced locating the monument were:
  - Inaccurate directions on MapQuest and Yahoo Maps
  - Lack of directional signs on I-15, on canyon roads, and in communities
  - Lack of mileage to monument signs
  - Monument not clearly shown on state map
  - Road construction

Number of vehicles used

Question 16b
On this visit, please list the number of vehicles that you and your group used to enter the monument.

Results
- 76% of visitor groups arrived in one vehicle (see Figure 30).
- 14% arrived in two vehicles.

Figure 30: Number of vehicles used by visitor groups on this visit

* total percentages do not equal 100 due to rounding
** total percentages do not equal 100 because visitors could select more than one answer
Length of visit

Question 15
On the day you received this questionnaire, how long did you and your group spend visiting Timpanogos Cave NM?

Results
- 35% of visitor groups visited four hours (see Figure 31).
- 28% spent three hours.
- 16% spent five or more hours.

Sites visited

Question 10
For this visit, please check all the sites that you and your group visited in Timpanogos Cave NM.

Results
- 85% of visitor groups walked/hiked the cave trail (see Figure 32).
- 84% visited the cave.
- 73% visited the visitor center.
Activities

Question 6a
On the list below, please check all of the activities which you and your group participated in during this visit to Timpanogos Cave NM.

Results
- As shown in Figure 33, the most common activities on this visit included:
  - 85% Taking cave tour
  - 63% Hiking/walking
- The least common activity was:
  - 1% Attending evening programs
- 3% of visitor groups listed “other” activities which included:
  - Camping
  - Gold panning
  - Throwing rocks in river
  - Checking out picnic grounds

* total percentages do not equal 100 due to rounding
** total percentages do not equal 100 because visitors could select more than one answer

Figure 33: Visitor activities on this visit
Question 6b  
Which of the above activities was the primary activity that you and your group participated in during this visit to Timpanogos Cave NM?

Results
- 77% of visitor groups indicated that taking the cave tour was their primary activity (see Figure 34).

![Figure 34: Primary activity](image)

** total percentages do not equal 100 because visitors could select more than one answer
Safety concerns while visiting the monument

Question 7a
On this visit, did you and your group have any specific safety concerns while visiting Timpanogos Cave NM?

Results
- 20% of visitor groups had specific safety concerns (see Figure 35).

Any specific safety concerns?

No 80%
Yes 20%

Number of respondents

N=277 visitor groups

Figure 35: Safety concerns in the monument

Question 7b
If YES, what were the concerns?

Results
- The safety issues affecting visitors’ (N=58) experience included:
  - Falling rocks
  - Narrow walkways
  - Fear of falling off edge of cliffs
  - No handrails/guard rails
  - Steep trail
  - Lack of water
  - Strenuous hike
  - Snakes
  - Heat

* total percentages do not equal 100 due to rounding
** total percentages do not equal 100 because visitors could select more than one answer
Visitor opinions about the cave tour fee

Question 8
Timpanogos Cave NM currently charges a fee ($7/adult aged 16 years and older, $5/junior aged 6 to 15, and $3/child aged 3 to 5) for the cave tour (not the Introduction to Caving Tour). In your opinion, how appropriate are the amounts of these fees?

Results

**Appropriateness of adult fee**
- 71% of visitor groups felt the fee was “about right” (see Figure 36).
- 20% felt the fee was “high.”

**Appropriateness of junior fee**
- 72% of visitor groups felt the fee was “about right” (see Figure 37).
- 20% felt the fee was “high.”

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
**Appropriateness of child fee**

- 71% of visitor groups felt the fee was "about right" (see Figure 38).
- 16% felt the fee was "high."

![Bar chart showing the appropriateness of child fee. N=244 visitor groups. 71% felt it was "about right," 16% felt it was "high," 2% felt it was "too low," 1% felt it was "low," and 9% felt it was "too high."](image)

Participation in cave tour and value of fee paid for the tour

Question 9a
On this visit, did you and your group take the cave tour?

Results
- 84% of visitor groups took the cave tour (see Figure 39).

![Figure 39: Participation in cave tour](image)

Question 9b
If YES, please rate the value received for the fee paid for the tour.

Results
- 81% of visitor groups felt the value of the fee paid was “very good” or “good” (see Figure 40).
- 1% felt the value was “very poor” or “poor.”

![Figure 40: Value for fee paid for cave tour](image)

* total percentages do not equal 100 due to rounding
** total percentages do not equal 100 because visitors could select more than one answer
Perceptions of crowding during cave tour

Question 9c
How many people were in your cave tour?

Results
- 27% of visitor groups had 1-5 people in their tour (see Figure 41).
- 27% had 16-20 people in their tour.
- 23% had 11-15 people in their tour.

Figure 41: Number of people in cave tour

Question 9d
How crowded did you and your group feel during your cave tour?

Results
- 44% of visitor groups felt “neither crowded nor uncrowded” during their tour (see Figure 42).
- 29% felt “somewhat crowded.”
- 19% felt “extremely crowded.”

Figure 42: Perceptions of crowding during cave tour

* total percentages do not equal 100 due to rounding
** total percentages do not equal 100 because visitors could select more than one answer
Question 9e
What do you and your group think is the maximum acceptable number of people in each cave tour group before it comes too crowded?

Results
- 66% of visitor groups felt there was an acceptable maximum number of people for each cave tour (see Figure 43).
- 40% felt the acceptable maximum number of people for each cave tour was 16-20 people (see Figure 44).
- 32% felt the acceptable maximum number of people was 11-15 people.
- 21% felt the acceptable maximum number of people was 6-10 people.
- The minimum number of people mentioned was five.

![Figure 43: Maximum acceptable number of people on cave tour before it becomes too crowded](image)

Ratings of Visitor Services, Facilities, Elements, Attributes, and Resources

Information services and facilities used

Question 11a
Please check all of the information services and facilities that you and your group used during this visit to Timpanogos Cave NM.

Results
- As shown in Figure 45, the most used information services/facilities included:
  - 85% Cave tour
  - 56% Monument brochure/map
  - 51% Trailside interpretive signs
- The least used services/facilities included:
  - 3% Special tour (Introduction to Caving Tour)
  - 2% Evening programs

Figure 45: Visitor information services and facilities used

* total percentages do not equal 100 due to rounding
** total percentages do not equal 100 because visitors could select more than one answer
Importance ratings of information services and facilities

Question 11b
For only those services and facilities that you or your group used, please rate their importance from 1 to 5.

1=Not important
2=Somewhat important
3=Moderately important
4=Very important
5=Extremely important

Results

- Figure 46 shows the combined proportions of “extremely important” and “very important” ratings for all services and facilities that were rated by enough visitor groups (N≥30).

- The services/facilities receiving the highest combined proportions of “extremely important” and “very important” ratings were:
  - 95% Cave tour
  - 67% Monument website
  - 53% Monument brochure/map

- Figures 47 to 59 show the importance ratings for each information service and facility.

- The service/facility receiving the highest “not important” rating was:
  - 15% Monument newspaper “Timpanogos Reflections”

* total percentages do not equal 100 due to rounding

Elements affecting park experience

Question 23
On this visit to Timpanogos Cave NM, please indicate how the following elements may have affected your park experience?

Results
- 21% of visitor groups indicated large numbers of people in cave tour “detracted from” their experience the most (see Table 6).
- 71% reported quality of tour guide “added to” their park experience.
- 68% did not experience a sold out cave tour.
- 64% were not affected by noise from other visitors.
- 21% reported that large numbers of people in cave tour “detracted from” their visit.

Information about Future Preferences

Proposed site for new visitor center

Question 21a
The map above shows the proposed site for a new visitor center, the current visitor center will be closed. On a future visit would you and your group be interested in visiting the new visitor center at the proposed site?

Results
- 61% of visitor groups indicated interest in visiting the new visitor center at the proposed site (see Figure 101).

![Figure 101: Interest in visiting new visitor center at proposed site](image)

Services and facilities at new visitor center

Question 21a
If YES, what services and facilities would you like to have available at the new visitor center?

Results
- As shown in Figure 102, the most preferred services and facilities included:
  - 91% Restrooms
  - 88% Cave tour ticket sales
  - 82% Bookstore/gift store
- 6% of visitor groups preferred “other” services and facilities which included:
  - Concessions
  - Snack bar
  - Food & drink
  - Souvenirs
  - First aid station
  - Geology/forestry/botany checklist for hike
  - Wildflower guide

Question 21a
What film/video programs would you like shown at the new visitor center?

Results
- Table 8 lists the film/video subjects that visitors would like shown at the new visitor center.

Table 8: Preferred film/video subjects to be shown at the new visitor center
N=47 comments; some visitor groups made more than one comment.

Subjects to learn about on a future visit

Question 24
On a future visit, how would you and your group prefer to learn about Timpanogos Cave NM?

Results
- 93% of visitor groups were interested in learning about the monument on a future visit (see Figure 103).
- As shown in Figure 104, the most commonly mentioned methods to learn about the monument on a future visit were:
  - 65% Visitor center exhibits
  - 58% Visitor center information desk
  - 51% Ranger-led tours
  - 51% Trailside exhibits
- 2% of visitor groups preferred “other” learning methods which included:
  - Cave tour
  - More hands-on time in cave
  - Interpretive dance

Question 28
Overall, how would you and your group rate the quality of the facilities, services, and recreational opportunities provided to you and your group at Timpanogos Cave NM during this visit?

Results
- 93% of visitor groups rated the overall quality as “very good” or “good” (see Figure 105).
- No visitors groups rated the overall quality as “very poor” or “poor.”

APPENDICES

Appendix 1: The Questionnaire
Appendix 2: Additional Analysis

The Visitor Services Project (VSP) offers the opportunity to learn more from VSP visitor study data. Additional analysis can be done using the park’s VSP visitor study data that was collected and entered into the computer. Two-way and three-way cross tabulations can be made of any of the characteristics listed below. Be as specific as possible—you may select a single program/service/facility instead of all that were listed in the questionnaire. Include your name, address and phone number in the request.

- Sources of information prior to visit
- Ability to obtain needed information
- Awareness of difference between a state park and a national park
- Awareness of difference between a national forest and national park
- Awareness of unit of NPS
- Primary reason for visiting the area
- Adequacy of directional signs
- Difficulty locating monument
- Monument as destination
- Activities participated in during this visit
- Safety concerns while in monument
- Appropriateness of cave tour fee
- Participation in cave tour
- Value for fee paid for cave tour
- Perceptions of crowding
- Maximum acceptable number of people in each cave tour
- Sites visited
- Information services and facilities used
- Importance of information services and facilities
- Quality of information services and facilities
- Visitor services and facilities used
- Importance of visitor services and facilities
- Quality of visitor services and facilities
- Guided tour
- School/educational group
- Family reunion group
- Corporate group
- Scouts/youth group
- Church group
- Group type
- Length of visit
- Group size
- Number of vehicles used
- Visitor age
- Zip code/state of residence
- Country of residence
- Number of times visited the monument in the past 12 months
- Number of times visited the monument in visitor lifetime
- Visitors with disabilities/impairments
- Type of disability/impairment
- Encounter access/service problems?
- Visitor level of education
- English as primary language
- Visiting proposed visitor center in future
- Preferred services/facilities at proposed new visitor center
- Importance of protecting monument resources/qualities
- Elements affecting park experience
- Preferred learning methods on a future visit
- Overall quality of visitor facilities, services, and recreational opportunities

Appendix 3: Decision Rules for Checking Non-response Bias

There are several methods for checking non-response bias. However, the most common way is to use some demographic indicators to compare between respondents and non-respondents (Dey 1997; Salant and Dillman 1994; Dillman 2000; Stoop 2004). In this study, group size and age of the group member (at least 16 years old) completing the survey were the two variables that were used to check for non-response bias.

Two-independent sample T-tests were used to test the differences between respondents and non-respondents. The p-values represent the significance levels of these tests. If p-value is greater than 0.05 the two groups are judged to be insignificantly different. In regard to age difference, various reviews of survey methodology (Dillman and Carley-Baxter 2000; Goudy 1976, Filion 1976, Mayer and Pratt Jr. 1967) have consistently found that in public opinion surveys, average respondent ages tend to be higher than average non-respondent ages. This difference is often caused by other reasons such as availability of free time rather than problems with survey methodology. In addition, because unit of analysis for this study is a visitor group, the group member who received the questionnaire may be different than the one who actually completed it after the visit. Sometimes the age of the actual respondent is higher than the age of the group member who accepted the questionnaire at the park. Thus, a 5-year difference in average age between respondents and non-respondents is an acceptable justification.

Therefore, the hypotheses for checking non-response bias are:

1. Average age of respondents – average age of non-respondents ≤ 5
2. Average group size of respondents – average group size of non-respondents = 0

As shown in Table 2, the p-values for both of these tests are greater than 0.05 indicating insignificant difference between respondents and non-respondents. Thus, non-response bias is judged to be insignificant.
