Philip Cook is a Research Associate, Ariel Blotkamp is a Research Assistant, and Marc Manni is a Research Analyst with the Visitor Services Project. Dr. Steven Hollenhorst is the Director of the Park Studies Unit, Department of Conservation Social Sciences, University of Idaho. We thank Dr. Mark Morgan, Associate Professor, University of Missouri-Columbia, Randa Celley, and the staff of James A. Garfield National Historic Site for assisting with the survey, and David Vollmer and Yanyin Xu for data processing.
Visitor Services Project
James A. Garfield National Historic Site
Report Summary
General Visitor Groups

- This report describes the results of a visitor study at James A. Garfield's National Historic Site (NHS) during July 24 - September 1, 2009. A total of 339 questionnaires were distributed to visitor groups. Of those, 241 questionnaires were returned, resulting in a 71.1% response rate.

- This report profiles a systematic random sample of James A. Garfield NHS visitors. Most results are presented in graphs and frequency tables. Summaries of visitor comments are included in this report and complete comments are included in the Visitor Comments Appendix.

- Fifty percent of visitor groups were in groups of two and 33% were in groups of three or four. Seventy-five percent of visitor groups were in family groups.

- United States visitors comprised 97% of total visitation during the survey period, with 58% from Ohio and smaller proportions from 34 other states and Washington, D.C. International visitors were from six countries and comprised 3% of total visitation.

- Eighty-four percent of visitor groups were visiting the park for the first time. Four percent of visitor groups had visited the park three or more times.

- Forty-one percent of visitors were ages 51-70 years, 18% were 15 years or younger, and 9% were 66 years or older. Two percent of visitors were Hispanic or Latino, and 96% of visitors were of White racial background.

- Thirty-seven percent of respondents had a graduate degree and 32% had a bachelor’s degree. Twenty-three percent of respondents had an annual income of $50,000-$74,999. Eight percent of visitor groups had members with physical conditions.

- Most visitor groups (85%) obtained information about the park prior to their visit. The most commonly used sources of information were the park website (47%) and friends, relatives, or word of mouth (26%). Most visitor groups (92%) received the information they needed.

- Thirty-eight percent of visitor groups stayed overnight away from their permanent residence within a 1-hour drive of the park. Thirty-six percent of those visitor groups stayed one night within a 1-hour drive of the park, 26% stayed two nights, and 38% percent stayed three or more nights in the area. Of the visitors who stayed overnight in the area, 68% stayed in a lodge, hotel, motel, cabin, B&B, etc.

- Fifty-eight percent of visitor groups spent two hours visiting the park. The average length of stay was 1.9 hours.

- The most common visitor activities at James A. Garfield NHS were taking the guided tour (89%), viewing visitor center exhibits (87%), and visiting the visitor center (82%).

- The visitor services and facilities most commonly used by visitor groups were the visitor center (93%) and visitor center exhibits (89%).

- The average group expenditure in the park and the surrounding area (within a 1-hour drive) was $156, with a median (50% spent more and 50% spent less) of $60. The average total expenditure per person was $64.

- Most visitor groups (95%) rated the overall quality of facilities, services, and recreational opportunities at James A. Garfield NHS as “very good” or “good.” Less than 1% of visitor groups rated the overall quality as “very poor” or “poor.”
Report Summary
Old Village Market Visitors Groups

- A total of 126 questionnaires were distributed to visitor groups at the Old Village Market. Of those, 79 questionnaires were returned, resulting in a 62.7% response rate.

- Forty-seven percent of visitor groups were in groups of two and 35% were in groups of three or four. Sixty-four percent of visitor groups were in family groups.

- United States visitors comprised 98% of total visitation during the survey period, with 92% from Ohio and smaller proportions from five other states. International visitors were from two countries and comprised 2% of total visitation.

- Forty-six percent of visitor groups were visiting the park for the first time. Thirty-five percent of visitor groups had visited the park three or more times.

- Thirty-seven percent of visitors were ages 46-65 years, 21% were ages 15 years or younger, and 16% were over 66 years or older. No visitors were Hispanic or Latino, and 100% of visitors were of White racial background.

- Twenty-nine percent of respondents had some college and 28% had a bachelor’s degree. Twenty percent of respondents had an annual income of $50,000-$74,999 and 20% had an annual income of $75,000-$99,999. Thirteen percent of visitor groups had members with physical conditions.

- Forty-six percent of visitor groups spent up to 1 hour visiting the park and 41% spent two hours. The average length of stay was 1.5 hours.

- The most common visitor activities at James A. Garfield NHS were attending Old Village Market (71%), viewing visitor center exhibits (35%), and taking the guided tour of James A. Garfield Home (32%).

- The average group expenditure in the park and the surrounding area (within a 1-hour drive) was $31, with a median (50% spent more and 50% spent less) of $20. The average total expenditure per person was $13.

For more information about the Visitor Services Project, please contact the Park Studies Unit at the University of Idaho at (208) 885-7863 or the following website http://www.psu.uidaho.edu

INTRODUCTION

This report describes the results of a visitor study at James A. Garfield National Historic Site (NHS), conducted July 24 - September 1, 2009 by the National Park Service (NPS) Visitor Services Project (VSP), part of the Park Studies Unit (PSU) at the University of Idaho.

The National Park Service website for James A. Garfield National Historic Site describes the park: “James A. Garfield acquired this home in 1876 to accommodate his large family. Named Lawnfield by reporters it was the site of the first successful front porch campaign which saw Garfield elected as 20th President of the United States in 1880. After Garfield's assassination, the Memorial Library wing was added by Mrs. Garfield - setting the precedent for presidential libraries” (James A. Garfield National Historic Site, National Park Service, Department of the Interior website www.nps.gov/jaga, December, 2009).

Organization of the report

The report is organized into three sections.

Section 1: Methods. This section discusses the procedures, limitations, and special conditions that may affect the study results.

Section 2: Results (not including Old Village Market visitor groups). This section provides summary information for each question in the questionnaire and also includes a summary of visitor comments. The presentation of the results of this study does not follow the order of questions in the questionnaire.

Section 3: Appendices

Appendix 1: Old Village Market Visitor Groups. Results for Old Village Market visitor groups.

Appendix 2: The Questionnaire. A copy of the questionnaire distributed to visitor groups.

Appendix 3: Additional Analysis. A list of sample questions for cross-references and cross comparisons. Comparisons can be analyzed within park or between parks. Results of additional analyses are not included in this report as they may only be requested after the results of this study have been published.

Appendix 4: Decision rules for checking non-response bias. An explanation of how the non-response bias was determined.

Appendix 5: Visitor Services Project Publications. A complete list of publications by the VSP. Copies of these reports can be obtained by visiting the website: www.psu.uidaho.edu/vsp/reports.htm or contacting the VSP office at (208) 885-7863.

Visitor Comments Appendix: A separate appendix provides visitor responses to open-ended questions. It is bound separately from this report due to its size.
Presentation of the results

Results are presented in the form of graphs (see example below), scatter plots, pie charts, tables, or text.

SAMPLE ONLY

1: The figure title describes the graph’s information.

2: Listed above the graph, the “N” shows the number of individuals or visitor groups responding to the question. If “N” is less than 30, "CAUTION!" is shown on the graph to indicate the results may be unreliable.

* appears when total percentages do not equal 100 due to rounding.

** appears when total percentages do not equal 100 because visitors could select more than one answer choice.

3: Vertical information describes the response categories.

4: Horizontal information shows the number or proportions of responses in each category.

5: In most graphs, percentages provide additional information.

Figure 14: Number of visits to park in past 12 months
METHODS

Survey Design

Sample size and sampling plan

All VSP questionnaires follow design principles outlined in Don A. Dillman's book *Mail and Internet Surveys: The Tailored Design Method* (2007). Using this methodology, the sample size was calculated based on the park visitation statistics of previous years.

Brief interviews were conducted with a systematic, random sample of visitor groups that arrived at selected locations in James A. Garfield NHS during July 24 - September 1, 2009. Table 1 shows the two locations, number of questionnaires distributed at each location, and the response rate for each location. Visitors were surveyed between the hours of 10 a.m. and 5 p.m., except on Fridays when Old Village Markets were held and survey hours were extended until 8 p.m. During this survey, a total of 497 visitor groups were contacted and 465 of these groups (93.6%) accepted questionnaires (average acceptance rate for 205 VSP visitor studies is 90.9%). Questionnaires were completed and returned by a total of 320 visitor groups resulting in an overall response rate of 68.8% for this study. For the general visitor groups, 339 questionnaires were distributed at the visitor center and 241 were returned, resulting in a 71.1% response rate. For the Old Village Market visitors, 126 questionnaires were distributed and 79 were returned, resulting in a 62.7% response rate. The average response rate for the 205 VSP visitor studies conducted from 1988 through 2008 was 74.2%.

Questionnaire design

The James A. Garfield NHS questionnaire was developed at a workshop held with park staff to design and prioritize the questions. Some of the questions were comparable with VSP studies conducted at other parks while others were customized for James A. Garfield NHS. Many questions asked visitors to choose answers from a list of responses, often with an open-ended option, while others were completely open-ended.
No pilot study was conducted to test the James A. Garfield NHS questionnaire. However, all questions followed Office of Management and Budget (OMB) guidelines and/or were used in previous surveys, thus the clarity and consistency of the survey instrument have been tested and supported.

Survey procedure

Visitor groups were greeted, briefly introduced to the purpose of the study, and asked to participate. If visitors agreed, they were asked which member (at least 16 years old) had the next birthday. The individual with the next birthday was selected to complete the questionnaire for the group. An interview, lasting approximately two minutes, was conducted with that person to determine group size, group type, and the age of the member completing the questionnaire. These individuals were asked for their names, addresses, and telephone numbers or email addresses in order to mail them a reminder/thank you postcard and follow-ups. Visitors were asked to complete the survey after their visit, and return the questionnaire by mail. The questionnaires were pre-addressed and affixed with a U.S. first class postage stamp.

Two weeks following the survey, a reminder/thank you postcard was mailed to all participants who provided a valid mailing address (see Table 2). Replacement questionnaires were mailed to participants who had not returned their questionnaires four weeks after the survey. Seven weeks after the survey, a second round of replacement questionnaires was mailed to visitors who had not returned their questionnaires. In order to distribute all 465 questionnaires, the survey period was extended. This resulted in a second and third round of follow-up mailings.

Data Analysis

Returned questionnaires were coded and the visitor responses were processed using custom and standard statistical software applications—Statistical Analysis Software® (SAS), and a custom designed FileMaker Pro® application. Descriptive statistics and cross-tabulations were calculated for the coded data.
and responses to open-ended questions were categorized and summarized. Double-key data entry validation was performed on numeric and text entry variables and the remaining checkbox (bubble) variables were read by optical mark recognition (OMR) software.

### Limitations

Like all surveys, this study has limitations that should be considered when interpreting the results.

1. This was a self-administered survey. Respondents completed the questionnaire after the visit, which may have resulted in poor recall. Thus, it is not possible to know whether visitor responses reflected actual behavior.

2. The data reflect visitor use patterns to the selected sites during the study period of July 24 - September 1, 2009. The results present a ‘snapshot-in-time’ and do not necessarily apply to visitors during other times of the year.

3. Caution is advised when interpreting any data with a sample size of less than 30, as the results may be unreliable. Whenever the sample size is less than 30, the word “CAUTION!” is included in the graph, figure, table, or text.

4. Occasionally, there may be inconsistencies in the results. Inconsistencies arise from missing data or incorrect answers (due to misunderstood directions, carelessness, or poor recall of information). Therefore, refer to both the percentage and N (number of individuals or visitor groups) when interpreting the results.

### Special Conditions

The weather during the survey period was generally sunny and warm, with occasional rain showers. During the first round of surveys (July 24 - August 1), mean temperatures were in the 70s. During the second round of surveys (August 10 - 23), mean temperatures ranged from the low 70s to the low 80s. During the third round of surveys (August 29 - September 1), it was cooler with some rain showers and mean temperatures in the 60s.

On Fridays during late July and August, the park hosts the Old Village Market from 4 p.m. to 8 p.m. The market is a collaboration between the City of Mentor and the park. Locally grown produce, arts and crafts, food, and other products are for sale by dozens of vendors. Music, special exhibits, and tours of the Garfield home and museum are also available.
Checking Non-response Bias

Four variables were used to check non-response bias: respondents’ age, travel distance from home to the park, overall quality rating score, and level of education. There were no significant differences between early and late responders in any of these variables (see Tables 3 and 4). Non-response bias is thus judged to be insignificant. See Appendix 4 for more details of the non-response bias checking procedures.

RESULTS FOR GENERAL VISITOR GROUPS
(not including Old Village Market Visitor Groups)

Group and Visitor Characteristics

Visitor group size

Question 22b
On this visit, how many people were in your personal group, including yourself?

Results
- 50% of visitors were in groups of two (see Figure 1).
- 33% were in groups of three or four.
- 9% were in groups of five or more.

![Figure 1: Visitor group size](chart)

Visitor group type

Question 22a
On this visit, what kind of personal group (not guided tour/school/other organized group) were you with?

Results
- 75% of visitor groups were made up of family members (see Figure 2).
- 10% were alone.
- Less than 1% were in “other” types of groups, but no types of groups were specified.

![Figure 2: Visitor group type](chart)

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Visitors with organized groups

Question 21a
On this visit, were you and your personal group part of a commercial guided tour group?

Results
• 1% of visitor groups were part of a commercial guided tour group (see Figure 3).

Question 21b
On this visit, were you and your personal group part of a school/educational group?

Results
• Less than 1% of visitor groups were part of a school/educational group (see Figure 4).

Question 21c
On this visit, were you and your personal group part of an “other” organized group (scouts, work, church, etc.)?

Results
• 2% of visitor groups were part of an “other” organized group (see Figure 5).

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Question 21d
If you were with one of these organized groups, how many people, including yourself, were in this group?

Results – Interpret with CAUTION!
• Not enough visitor groups responded to this question to provide reliable data (see Figure 6).

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer

Figure 6: Organized group size
United States visitors by state of residence

Question 24b
For you and your personal group on this visit, what is your state of residence?

Note: Response was limited to seven members from each visitor group.

Results
- U.S. visitors were from 35 states and Washington, D.C. and comprised 97% of total visitation to the park during the survey period.
- 58% of U.S. visitors came from Ohio (see Table 5 and Map 1).
- Smaller proportions of U.S. visitors came from 34 other states and Washington, D.C.

Number of visits

Question 24c
For you and your personal group on this visit, how many times have you visited James A. Garfield NHS in your lifetime (including this visit)?

Note: Response was limited to seven members from each visitor group.

Results
- 84% of visitors were visiting the park for the first time (see Figure 7).
- 12% visited two times.
- 4% visited the park three or more times.

*total percentages do not equal 100 due to rounding

Visitor age

Question 24a
For you and your personal group on this visit, what is your current age?

Note: Response was limited to seven members from each visitor group.

Results
- Visitor ages ranged from 1 to 96 years.
- 41% of visitors were in the 51-70 years age group (see Figure 8).
- 18% were 15 years or younger.
- 9% were 71 years or older.

![Visitor Age Distribution](image)

Visitor ethnicity

Question 25a
Are you or members of your group Hispanic or Latino?

Note: Response was limited to seven members from each visitor group.

Results
• 2% of visitors were Hispanic or Latino (see Figure 9).

Figure 9: Visitors who were Hispanic or Latino

Visitor race

Question 25b
What is your race? What is the race of each member of your personal group?

Note: Response was limited to seven members from each visitor group.

Results
• 96% of visitors were White (see Figure 10).
• 3% were Asian.
• 1% were Black or African American.

Figure 10: Visitor race

Visitors with physical conditions

Question 23a
Does anyone in your personal group have a physical condition that made it difficult to access or participate in park activities or services?

Results
- 8% of visitor groups had members with physical conditions that made it difficult to access or participate in park activities or services (see Figure 11).

Figure 11: Visitor groups that had members with physical conditions

Question 23b
If YES, what services or activities were difficult to access/participate in? (open-ended)

Results – Interpret with CAUTION!
- Thirteen visitor groups commented on services and activities that were difficult to access or participate in (see Table 7).

Table 7: Services/activities that were difficult to access/participate in

Question 23c
Did the person(s) access or participate in the services/activities that were difficult?

Results – Interpret with CAUTION!
- Not enough visitor groups responded to this question to provide reliable results (see Figure 12).

![Figure 12: Visitor groups that accessed or participated in services/activities that were difficult](image)

Question 23d
Because of the physical condition, what specific problems did the person(s) have?

Results – Interpret with CAUTION!
- Not enough visitor groups responded to this question to provide reliable results (see Figure 13).
- Visitor groups with "other" problems (20%) did not specify what they were.

![Figure 13: Specific problem due to physical condition](image)

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
**Respondents’ level of education**

**Question 26**
For you only, what is the highest level of education you have completed?

**Results**
- 37% of respondents had a graduate degree (see Figure 14).
- 32% had a bachelor’s degree.

*total percentages do not equal 100 due to rounding

**Figure 14: Respondents’ level of education**
Household income

Question 29a
Which category best represents your annual household income?

Results
- 23% of respondents had an annual income of $50,000-$74,999 (see Figure 15).
- 16% had an annual income of $75,000-$99,999.
- 15% had an annual income of $100,000-$149,999.

Household size

Question 29b
How many people are in your household?

Results
- 57% of respondents had two people in their household (see Figure 16).
- 15% had one person.

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Awareness of park

Question 3
Prior to this visit, were you and your personal group aware that James A. Garfield NHS is a unit of National Park System?

Results
- 55% of visitor groups were aware that James A. Garfield NHS is a unit of National Park System (see Figure 17).

*N=238 visitor groups

*total percentages do not equal 100 due to rounding

**total percentages do not equal 100 because visitors could select more than one answer

Figure 17: Visitor groups that were aware that James A. Garfield NHS is a unit of National Park System
Information sources prior to visit

Question 1a
Prior to your visit, how did you and your personal group obtain information about James A. Garfield National Historic Site (NHS)?

Results

- 85% of visitor groups obtained information about James A. Garfield NHS prior to their visit (see Figure 18).

- As shown in Figure 19, among those visitor groups who obtained information about James A. Garfield NHS prior to their visit, the most common sources were:
  
  - 47% Park website
  - 26% Friends/relatives/word of mouth
  - “Other” sources (18%) were:
    - Books
    - City Mentor Channel
    - Highway/road sign
    - Mentor’s Old Village Market
    - NPS Passport
    - Study of American/presidential history
    - Yellow Pages

*total percentages do not equal 100 due to rounding

**total percentages do not equal 100 because visitors could select more than one answer
Question 1c
From the sources you used prior to this visit, did you and your personal group receive the type of information about the park that you needed?

Results
- 92% of visitor groups received needed information prior to their visit (see Figure 20).

Figure 20: Visitor groups that received needed information prior to their visit

Question 1d
If NO, what type of park information did you and your personal group need that was not available? (open-ended)

Results – Interpret with CAUTION!
- Seven visitor groups listed information they needed, but did not receive (see Table 8).

**Information sources for future visit**

Question 1b

If you were to visit James A. Garfield NHS in the future, how would you and your personal group prefer to obtain information about the park?

Results

- As shown in Figure 21, the most common source of information to use for a future visit was:
  
  67% Park website

- “Other” sources of information (4%) were:
  
  - Books
  - Advertisements
  - Official Guide

*total percentages do not equal 100 due to rounding

**total percentages do not equal 100 because visitors could select more than one answer

**Figure 21: Sources of information to use for a future visit**
Park website

Question 2a
Overall, how would you rate the quality of information provided on the park website (www.nps.gov/jaga) for planning trips to James A. Garfield NHS?

Results
- 47% of visitor groups used the park website prior to their visit (see Figure 22).
- 93% of visitor groups who used the park website rated the information quality as “very good” or “good” (see Figure 23).

Figure 22: Visitor groups that used the park website

Primary reason for visiting park area

Question 6
On this trip, what was the primary reason that you and your personal group came to the Mentor, Ohio area (within a 1-hour drive of park)?

Results
- 20% of visitor groups were residents of the area (see Figure 25).
- As shown in Figure 26, the most common primary reason for visiting the area among visitor groups that were not residents was:
  - 52% Visit the park
- The "other" primary reasons (11%) for visiting the area were:
  - Funeral
  - High school reunion
  - Prior resident of the area
  - Show family member the area
  - Supposed to be a free weekend
  - Get our Passport book stamped
  - Learn new things and visit new place
  - Purchase a park pass
  - Traveling through to wedding
  - Weekend getaway

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Reasons for visiting the park

Question 7
On this visit, what were the reasons that you and your personal group visited James A. Garfield NHS?

Results
- As shown in Figure 27, the most common primary reason for visiting the park was:
  - 84% Visit historic site/learn history
- “Other” reasons (10%) were:
  - Attend ranger talk
  - Because my teenager wanted to go
  - Fee-free weekend
  - Granddaughter had visited with class and wanted to return
  - It is close to Cleveland
  - Junior Ranger program
  - Left beach and went to site due to rain
  - Meet with staff regarding volunteering
  - Purchase park pass
  - Purchase senior pass
  - Take the tour
  - Teach homeschoolers
  - Visit again after 20 years

Other presidential sites visited

Question 17a
Have you and your personal group visited other presidents’ homes on this trip or past trips?

Results
- 68% of visitor groups to James A. Garfield NHS visited other presidents’ homes (see Figure 43).

Question 17b
If YES, which of the following have you and personal group visited?

Results
- 88% of visitor groups visited presidential homes in one or more other states (see Figure 44).

Question 17c
Please compare the quality of your overall experience at James A. Garfield NHS with your experiences at other presidential sites (above) that you have visited. Which of the following statements best describes your comparison?

Results
- 76% of visitor groups found the James A. Garfield home to be better than some, but not as good as other presidential sites (see Figure 45).

Activities on this visit

Question 13a
On this visit, in which activities did you and your personal group participate within James A. Garfield NHS?

Results
- As shown in Figure 46, the most common activities in which visitor groups participated were:
  - 89% Taking guided tour of James A. Garfield home
  - 87% Viewing visitor center exhibits
  - 82% Visiting visitor center
- "Other" activities (11%) were:
  - Going on the children's guided tour
  - Just to visit an NPS site
  - Obtaining NPS Passport Stamp
  - Purchasing a book about the site
  - Purchasing post cards
  - Riding bikes
  - Taking the Civil War tour
  - Viewing the house
  - Visiting a presidential site
  - Volunteering
  - Walking the ground

Primary activity on this visit

Question 13b
Which one of the above activities was the primary reason you and your personal group visited James A. Garfield NHS on this visit?

Results
- As shown in Figure 47, the most common primary activity was taking the guided tour of the James A. Garfield Home (87%).
- “Other” activities (5%) were:
  - Obtaining NPS Passport Stamp
  - Purchasing a book
  - Purchasing postcards
  - Riding bikes
  - Taking children’s tour
  - Taking Civil War tour
  - View the house grounds
  - Volunteering

Tour preferences

Question 14
If you took the ranger-led or volunteer-led tour of the James A. Garfield home on this visit, please indicate one response for each of the following aspects of the tour.

Results
- 92% of visitor groups took the tour of the James A. Garfield home (see Figure 48).

a. Tour length
- 93% of visitor groups found the tour length to be about right (see Figure 49).

b. Taking tour at desired time
- 97% of visitor groups were able to take the home tour at the desired time (see Figure 50).

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
c. **Ability to see interior of rooms due to tour size**
   - 96% of visitor groups were able to see the interior of rooms (see Figure 51).

d. **Topics discussed on tour**
   - 100% of visitor groups found the tour topics of interest (see Figure 52).

---

**Question 14e**

On the tour, did you learn something about James A. Garfield that is relevant or meaningful to your life today?

**Results**
- 77% of visitor groups on the home tour learned something relevant or meaningful to their life (see Figure 53).

Ratings of Visitor Services, Facilities, Attributes and Resources

Visitor services and facilities used

Question 18a
Please indicate all the visitor services and facilities that you or your personal group used at James A. Garfield NHS during this visit.

Results
- As shown in Figure 54, the most commonly used information services and facilities were:
  - 93% Visitor center
  - 89% Visitor center exhibits
  - 89% Guided tour of the Home

- The least used services/facilities were:
  - 3% Access for people with disabilities
  - <1% Junior Ranger program

Figure 54: Visitor services and facilities used

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Visitor ratings of visitor services and facilities

Question 18b

Next, for only those services and facilities that you or your personal group used, please rate their importance to your visit from 1-5.

1=Not important
2=Somewhat important
3=Moderately important
4=Very important
5=Extremely important

Results

- Figure 55 shows the combined proportions of “extremely important” and “very important” ratings for visitor services and facilities that were rated by 30 or more visitor groups.

- The visitor services and facilities receiving the highest combined proportions of “extremely important” and “very important” ratings were:

  97% Guided tour of the Home
  89% Restrooms
  84% Visitor center exhibits

- Figures 56 to 67 show the importance ratings for each visitor service and facility.

- The visitor service/facility receiving the highest “not important” rating that was rated by 30 or more visitor groups was:

  6% Bookstore sales items

**Quality ratings of visitor services and facilities**

**Question 18c**

Finally, for only those services and facilities that you or your personal group used, please rate their quality from 1-5.

1=Very poor  
2=Poor  
3=Average  
4=Good  
5=Very good

**Results**

- Figure 68 shows the combined proportions of “very good” and “good” quality ratings for visitor services and facilities that were rated by 30 or more visitor groups.

- The visitor services and facilities that received the highest combined proportions of “very good” and “good” quality ratings were:

  99% Guided tours of the Home  
  96% Assistance from park staff  
  92% Park brochure/map

- Figures 69 to 79 show the quality ratings for each service/facility.

- Note: No visitor groups rated the quality of the Junior Ranger program.

- The visitor service/facility receiving the highest “very poor” quality rating that was rated by 30 or more visitor groups was:

  5% Bookstore sales items

Quality of personal interaction with a park ranger

Question 16a
During this visit to James A. Garfield NHS, did you and your personal group have any personal interaction with a park ranger other than on the Home tour?

Results
• 76% of visitor groups had a personal interaction with a park ranger (see Figure 82).

Question 16b
If YES, please rate the quality of your interaction with the park ranger.

Results
• Visitor groups rated park rangers as "very good" or "good" are as follows (see Figure 83).
  - 98% Courteousness
  - 96% Helpfulness
  - 95% Quality of information provided

• Figures 84 to 86 show the quality ratings for each interaction.

Expenditures

Total expenditures inside and outside the park

Question 20
For you and your personal group, please estimate all expenditures for the items listed below for this visit to James A. Garfield NHS and the surrounding area (within a 1-hour drive of the park).

Results
- 60% of visitor groups spent $1-$100 (see Figure 87).
- 20% spent $101-$300.
- 15% spent $301 or more.
- The average visitor group expenditure was $156.
- The median group expenditure (50% of groups spent more and 50% of groups spent less) was $60.
- Average total expenditure per person (per capita) was $64.
- As shown in Figure 88, the largest proportions of total expenditures inside and outside the park were:
  - 33% Lodges, hotels, motels, cabins, B&B, etc.
  - 26% Restaurants and bars
  - 13% Gas and oil
  - 12% Groceries and takeout food
  - 10% Camping fees and charges
  - 7% Admission, recreation, entertainment fees
  - 5% Other transportation expenses
  - 5% Gas and oil
  - 4% All other purchases
  - 3% Lodges, hotels, motels, cabins, B&B, etc.

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
**Number of adults covered by expenditures**

**Question 20c**

How many adults (18 years or older) do these expenses cover?

**Results**

- 66% of visitor groups had two adults covered by expenditures (see Figure 89).
- 19% had three or more adults.

![Figure 89: Number of adults covered by expenditures]

**Number of children covered by expenditures**

**Question 20c**

How many children (under 18 years) do these expenses cover?

**Results**

- 67% of visitor groups had no children covered by expenditures (see Figure 90).
- 24% had one or two children.

![Figure 90: Number of children covered by expenditures]

*total percentages do not equal 100 due to rounding

**total percentages do not equal 100 because visitors could select more than one answer
Expenditures inside the park

Question 20a
Please list your group’s total expenditures inside James A. Garfield NHS.

Results
- 71% of visitor groups spent $1-$25 inside the park (see Figure 91).
- 14% spent no money.
- The average visitor group expenditure inside the park was $16.
- The median expenditure (50% of groups spent more and 50% of groups spent less) was $10.
- Average total expenditure per person (per capita) was $8.
- As shown in Figure 92, the largest proportions of total expenditures inside the park were:
  - 60% Admission recreation, entertainment fees
  - 35% All other purchases

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer

Donations

- 80% of visitor groups spent no money on donations inside the park (see Figure 95).
- 15% spent $1-$5.

*total percentages do not equal 100 due to rounding

**total percentages do not equal 100 because visitors could select more than one answer
Expenditures outside the park

Question 20b
Please list your group’s total expenditures in the surrounding area outside the park (within a 1-hour drive of the park).

Results
- 53% of visitor groups spent $1-$100 (see Figure 96).
- 20% spent $101-$300.
- 16% spent $301 or more.
- The average visitor group expenditure outside the park was $157.
- The median expenditure (50% of groups spent more and 50% of groups spent less) was $55.
- Average total expenditure per person (per capita) was $73.
- As shown in Figure 97, the largest proportions of total expenditures outside the park were:
  - 34% Lodges, hotels, motels, cabins, B&B, etc.
  - 27% Restaurants and bars
  - 13% Gas and oil

*total percentages do not equal 100 due to rounding

**total percentages do not equal 100 because visitors could select more than one answer
All other purchases (souvenirs, film, books, sporting goods, clothing, etc.)

- 67% of visitor groups spent no money on all other purchases outside the park (see Figure 105).
- 16% spent $1-$20.

Donations

- 88% of visitor groups spent no money on donations outside the park (see Figure 106).
- 7% spent $6 or more.

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Preferences for future visit

Preferred methods to learn about the park

Question 15
If you were to visit James A. Garfield NHS in the future, how would you and your personal group prefer to learn about cultural and natural history/features of James A. Garfield NHS?

Results
- 97% of visitor groups were interested in learning about cultural and natural history/features on future visits (see Figure 107).
- As shown in Figure 108, the most common preferred methods of learning about the park by visitor groups were:
  - 65% Ranger-led interpretive programs
  - 60% Indoor exhibits
  - 59% Films, movies, slideshows
- “Other” methods (3%) were:
  - A book about the house and the exhibits
  - Better informed tour guides
  - Interaction with guides
  - More time to wander the house and take in the details
  - Postcards
  - Reenactments/living history demonstrations

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Question 19
Overall, how would you rate the quality of the facilities, services, and recreational opportunities provided to you and your personal group at James A. Garfield NHS during this visit?

Results
- 95% of visitor groups rated the overall quality of facilities, services, and recreational opportunities as “very good” or “good” (see Figure 109).
- Less than 1% rated the quality as “very poor” or “poor.”

Figure 109: Overall quality rating of facilities, services, and recreational opportunities

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Visitor Comments

What visitors liked most

Question 27a
What did you and your personal group like most about your visit to James A. Garfield NHS?

Results
- 90% of visitor groups (N=216) responded to this question.
- Table 16 shows a summary of visitor comments. A complete copy of hand-written comments is included in the Visitor Comments Appendix.

Additional comments

Question 28
Is there anything else you and your personal group would like to tell us about your visit to James A. Garfield NHS?

Results
- 54% of visitor groups (N=129) responded to this question.
- Table 18 shows a summary of visitor comments. A complete copy of handwritten comments is included in the Visitor Comments Appendix.

Appendix 1: Old Village Market Visitor Groups

Group and Visitor Characteristics

Visitor group size

Question 22b
On this visit, how many people were in your personal group, including yourself?

Results
- 47% of visitors were in groups of two (see Figure 110).
- 35% were in groups of three or four.
- 9% were in groups of five or more.

![Visitor group size](image)

Visitor group type

Question 22a
On this visit, what kind of personal group (not guided tour/school/other organized group) were you with?

Results
- 64% of visitor groups were made up of family members (see Figure 111).
- 14% were with friends.
- 1% were in “other” types of groups, but did not specify what type of group.

![Visitor group type](image)

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Visitors with organized groups

Question 21a
On this visit were you and your personal group part of a commercial guided tour group?

Results
- No visitor groups were part of a commercial guided tour group (see Figure 112).

Figure 112: Visitors with a commercial guided tour group

Question 21b
On this visit were you and your personal group part of a school/educational group?

Results
- No visitor groups were part of a school/educational group (see Figure 113).

Figure 113: Visitors with a school/educational group

Question 21c
On this visit were you and your personal group part of an other organized group (scout, work, church, etc.)?

Results
- 5% of visitor groups were traveling with an "other" organized group (see Figure 114).

Figure 114: Visitors with an “other” organized group

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Question 21d
If you were with one of these organized groups, how many people, including yourself, were in this group?

Results – Interpret with CAUTION!
- Not enough visitor groups responded to this question to provide reliable results (see Figure 115).

Figure 115: Organized group size

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
United States visitors by state of residence

Question 24b
For you and your personal group on this visit, what is your state of residence?

Note: Response was limited to seven members from each visitor group.

Results
- U.S. visitors were from six states and comprised 98% of total Old Village Market visitation to the park during the survey period.
- 92% of U.S. visitors came from Ohio (see Table 19 and Map 2).

Table 19: United States visitors by state of residence*

**Number of visits**

**Question 24c**
For you and your personal group on this visit, how many times have you visited James A. Garfield NHS in your lifetime (including this visit)?

**Note:** Response was limited to seven members from each visitor group.

**Results**
- 46% of visitors were visiting the park for the first time (see Figure 116).
- 35% of visitors had visited three or more times.

![Figure 116: Number of visits to park in lifetime](image)

*N=210 individuals

*total percentages do not equal 100 due to rounding

**total percentages do not equal 100 because visitors could select more than one answer*
Visitor age

Question 24a
For you and your personal group on this visit, what is your current age?

Note: Response was limited to seven members from each visitor group.

Results
- Visitor ages ranged from 1 to 80 years.
- 37% of visitors were in the 46-65 years age group (see Figure 117).
- 21% were 15 years or younger.
- 19% were 31-45 years old.
- 16% were 66 or older.

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Visitor ethnicity

Question 25a
Are you or members of your group Hispanic or Latino?

Note: Response was limited to seven members from each visitor group.

Results
- No visitors were Hispanic or Latino (see Figure 118).

Visitor race

Question 25b
What is your race? What is the race of each member of your personal group?

Note: Response was limited to seven members from each visitor group.

Results
- All visitors were White (see Figure 119).

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Visitors with physical conditions

Question 23a
Does anyone in your personal group have a physical condition that made it difficult to access or participate in park activities or services?

Results
- 13% of visitor groups had members with physical conditions that made it difficult to access or participate in park activities or services (see Figure 120).

![Figure 120](image)

Figure 120: Visitor groups that had members with physical conditions

Question 23b
If YES, what services or activities were difficult to access/participate in? (open-ended)

Results – Interpret with CAUTION!
- Two visitor groups commented on the services and activities that were difficult to access or participate in (see Table 21).

Table 21: Services/activities that were difficult to access/participate in

Respondents’ level of education

Question 26
For you only, what is the highest level of education you have completed?

Results
- 29% of respondents had some college (see Figure 123).
- 28% had a bachelor’s degree.

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer

Figure 123: Respondents’ level of education
Household income

Question 29a
Which category best represents your annual household income?

Results
- 20% of respondents had an annual income of $50,000-$74,999 (see Figure 124).
- 20% of respondents had an annual income of $75,000-$99,999.
- 16% of respondents had an annual income of $100,000-$149,999.

Figure 124: Annual household income

Household size

Question 29b
How many people are in your household?

Results
- 41% of respondents had two people in their household (see Figure 125).
- 23% had four people.

Figure 125: Number of people in household

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Awareness of park

Question 3
Prior to this visit, were you and your personal group aware that James A. Garfield NHS is a unit of National Park System?

Results
- 62% of visitor groups were aware that James A. Garfield NHS is a unit of National Park System (see Figure 126).

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer

Figure 126: Visitor groups that were aware James A. Garfield NHS is a unit of National Park System
Trip/Visit Characteristics and Preferences

Information sources prior to visit

Question 1a
Prior to your visit, how did you and your personal group obtain information about James A. Garfield National Historic Site (NHS)?

Results
- 78% of visitor groups obtained information about James A. Garfield NHS prior to their visit (see Figure 127).
- As shown in Figure 128, among those visitor groups who obtained information about James A. Garfield NHS prior to their visit, the most common sources were:
  - 56% Previous visits
  - 45% Newspaper/magazine articles
  - 31% Friends/relatives/word of mouth
- “Other” sources (25%) were:
  - Community newsletter
  - Flags outside
  - Highway/road sign
  - Mentor’s Old Village Market

Figure 127: Visitor groups that obtained information about James A. Garfield NHS prior to visit

Figure 128: Sources of information used by visitor groups prior to visit

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Question 1c  
From the sources you used prior to this visit, did you and your personal group receive the type of information about the park that you needed?

Results  
- 95% of visitor groups received needed information prior to their visit (see Figure 129).

![Figure 129: Visitor groups that received needed information prior to their visit](image)

Question 1d  
If NO, what type of park information did you and your personal group need that was not available? (open-ended)

Results – Interpret with **CAUTION**!  
- Two visitor groups listed information they needed, but did not receive (see Table 22).

<table>
<thead>
<tr>
<th>Type of information</th>
<th>Number of times mentioned</th>
</tr>
</thead>

</tbody>
</table>

Table 22: Needed information  
N=2 comments; **CAUTION**!

*total percentages do not equal 100 due to rounding  
**total percentages do not equal 100 because visitors could select more than one answer
Information sources for future visit

Question 1b
If you were to visit James A. Garfield NHS in the future, how would you and your personal group prefer to obtain information about the park?

Results
- As shown in Figure 130, the most common source of information to use for a future visit were:
  - 49% Park website
  - 45% Newspaper/magazine articles

Figure 130: Sources of information to use for a future visit

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
**Park website**

**Question 2a**
Overall, how would you rate the quality of information provided on the park website (www.nps.gov/jaga) for planning trips to James A. Garfield NHS?

**Results**
- 16% of visitor groups used the park website prior to their visit (see Figure 131).
- Interpret with **CAUTION!** Not enough visitor groups responded to provide reliable results (see Figure 132).

---

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer*
Question 2b
Did you find the information that you needed on the park website?

Results – Interpret with CAUTION!
- Not enough visitor groups responded to provide reliable results (see Figure 133).

![Bar Chart: Found needed information?](image)
- Yes: 83% (N=12 visitor groups)
- No: 17%

**Figure 133: Visitor groups that found the information they needed on the park website**

Question 2c
If NO, what type of information did you and your personal group need that was not available on the park website? (open-ended)

Results
- No visitor groups listed information they needed but was not available on the park website.

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Primary reason for visiting park area

Question 6
On this trip, what was the primary reason that you and your personal group came to the Mentor, Ohio area (within a 1-hour drive of park)?

Results
- 70% of visitor groups were residents of the area (see Figure 134).
- Interpret with CAUTION! Not enough visitor groups responded to provide reliable results (see Figure 135).
- "Other" (65%) reasons for visiting the area were:
  - Attend Old Village Market
  - Purchase a senior pass

Figure 134: Visitor groups that were residents of the area (within a 1-hour drive) of James A. Garfield NHS

Figure 135: Primary reason for visiting the area (within a 1-hour drive) of James A. Garfield NHS

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Reasons for visiting the park

**Question 7**

On this visit, what were the reasons that you and your personal group visited James A. Garfield NHS?

**Results**

- As shown in Figure 136, the most common primary reasons for visiting the park were:
  - 26% Visit historic sites
  - 15% Show the park to friends/relatives

- “Other” reasons (69%) were:
  - Attend Old Village Market
  - Purchase senior pass
  - To hear Denny Carleton

*total percentages do not equal 100 due to rounding

**total percentages do not equal 100 because visitors could select more than one answer*
Places stayed on night prior to visit

Question 8a
In what town/city did you and your personal group stay on the night before your arrival at James A. Garfield NHS? If you stayed at home please write the name of your hometown and state. (open-ended)

Results
- 84% of visitor groups (N=66) responded to this question.
- Table 23 shows the towns/cities in which visitor groups stayed on the night prior to visiting James A. Garfield NHS.

Table 23: Location of lodging on night prior to visit

**Adequacy of directional signs**

**Question 5**

On this visit, were the signs directing you and your personal group to James A. Garfield NHS adequate?

**Results**

a. **Interstate signs**

- 14% of visitor groups found interstate signs adequate (see Figure 137).

b. **State highway signs**

- 16% of visitor groups found state highway signs adequate (see Figure 138).

c. **Signs in local communities**

- 62% of visitor groups found signs in local communities adequate (see Figure 139).

*total percentages do not equal 100 due to rounding

**total percentages do not equal 100 because visitors could select more than one answer
Question 5d
If you answered NO for any of the above, please explain.

Results – Interpret with **CAUTION**!
- Four visitor groups commented on problems with directional signs (Table 25).

Travel route used

Question 4
On this visit to James A. Garfield NHS, which routes did you and your personal group use to reach Mentor, Ohio?

Results
- As shown in Figure 140, the most common routes used to reach Mentor, Ohio were:
  - 36% Highway 20 from the east
  - 19% Highway 615 from the north
  - 19% Highway 20 from the west
- “Other” (9%) route was:
  - Garfield Road

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Number of vehicles

Question 22c
On this visit, how many vehicles did you and your personal group use to arrive at the park?

Results
- 82% of visitor groups used one vehicle to arrive at the park (see Figure 141).

![Figure 141: Number of vehicles used to arrive at the park](image)

Number of park entries

Question 22d
On this trip, how many times did you and your personal group enter the park?

Results
- 96% of visitor groups entered the park once (see Figure 142).

![Figure 142: Number of park entries](image)

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Overnight stay

Question 9a
On this trip, did you and your personal group stay overnight away from your permanent residence in the Mentor, OH area (within a 1-hour drive of James A. Garfield NHS)?

Results
- 9% of visitor groups stayed overnight away from home within a 1-hour drive of the park (see Figure 143).

**Figure 143: Visitor groups that stayed overnight within a 1-hour drive of the park**

<table>
<thead>

Type of lodging in the area outside the park

Question 9c
In which types of lodging did you and your personal group spend the night(s) within a 1-hour drive of James A. Garfield NHS?

Results – Interpret with CAUTION!
- Not enough visitor groups responded to provide reliable results (see Figure 145).

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Length of visit in the park

Question 10b
On this visit, how long in total did you and your personal group spend visiting James A. Garfield NHS only?

Results
- 44% of visitor groups spent one hour visiting the park (see Figure 146).
- 41% spent two hours.
- The average length of stay at the park was 1.5 hours.

Planned length of visit versus actual visit in the park

Question 11
Compared with what you had planned, how much time did you and your personal group spend visiting James A. Garfield NHS?

Results
- 70% of visitor groups didn’t have a planned amount of time to visit the park (see Figure 147).
- 22% spent about the same time as planned.
- Interpret with CAUTION! Five visitor groups provided explanations for different length of visit than planned (see Table 26).

Table 26: Explanations for different length of visit than planned

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
**Length of stay in the area**

**Question 10a**
On this trip, how long in total did you and your personal group spend in the Mentor, Ohio area (within a 1-hour drive of James A. Garfield NHS)?

**Results**

**Number of hours if less than 24**
- 38% of visitor groups spent two hours in the area (see Figure 148).
- 25% spent one hour.
- The average length of stay for visitors who spent less than 24 hours in the area was 3.4 hours.

**Number of days if 24 hours or more**
- Interpret with **CAUTION!** Not enough visitor groups responded to this question to provide reliable results.
- Only two visitor groups indicated they spent more than 24 hours in the area. Both indicated they spent three days in the area.

**Average length of stay**
- The average length of stay for all visitors was 7.5 hours.

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer*
Sites visited in the area

Question 12
On this trip, which other places within a 1-hour drive of James A. Garfield NHS did you and your personal group visit?

Results
- 26% of visitor groups to James A. Garfield NHS visited other places within a 1-hour drive of the park (see Figure 149).
- Interpret with CAUTION! Not enough visitor groups responded to this question to provide reliable results (see Figure 150).
- “Other” sites (47%) visited were:
  Great Lakes Mall
  Heinen’s grocery store
  Rock and Roll Hall of Fame

Figure 149: Visitor groups that visited other places in area

Other presidential sites visited

Question 17a
Have you and your personal group visited other presidents’ homes on this trip or past trips?

Results
- 27% of visitor groups to James A. Garfield NHS visited other presidents’ homes (see Figure 151).

Figure 151: Visitor groups that visited other presidents’ homes

Question 17b
If YES, which of the following have you and personal group visited?

Results – Interpret with CAUTION!
- Not enough visitor groups responded to provide reliable results (see Figure 152).

Figure 152: Other presidents' homes visited

Question 17c
Please compare the quality of your overall experience at James A. Garfield NHS with your experiences at other presidential sites (above) that you have visited. Which of the following statements best describes your comparison?

Results – Interpret with CAUTION!
- Not enough visitor groups responded to provide reliable results (see Figure 153).

Figure 153: Comparison of presidential home site quality

Activities

Question 13a
On this visit, in which activities did you and your personal group participate within James A. Garfield NHS?

Results

- As shown in Figure 154, the most common activities in which visitor groups participated were:
  - 71% “Other” activities
  - 35% Viewing visitor center exhibits
  - 32% Taking guided tour of James A. Garfield home
- All “other” activities (71%) were attending the Old Village Market.

Primary activity on this visit

Question 13b
Which one of the above activities was the primary reason you and your personal group visited James A. Garfield NHS on this visit?

Results
- As shown in Figure 155, the most common primary activity was “other” (78%).
- All “other” activities (78%) were attending the Old Village Market.

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Tour preferences

Question 14
If you took the ranger-led or volunteer-led tour of the James A. Garfield home on this visit, please indicate one response for each of the following aspects of the tour.

Results
- 35% of visitor groups took the tour of the James A. Garfield home (see Figure 156).

a. Tour length
   - Interpret with CAUTION! Not enough visitor groups responded to provide reliable results (see Figure 157).

b. Taking tour at desired time
   - Interpret with CAUTION! Not enough visitor groups responded to provide reliable results (see Figure 158).

Ratings of Visitor Services, Facilities, Attributes and Resources

Visitor services and facilities used, importance, and quality

Question 18a
Please indicate all the visitor services and facilities that you or your personal group used at James A. Garfield NHS during this visit.

Results
- As shown in Figure 162, the most commonly used information services and facilities were:
  - 43% Outdoor exhibits
  - 40% Assistance from park staff
  - 38% Visitor center

- The least used services/facilities were:
  - 3% Access for people with disabilities
  - 0% Junior Ranger program

- Not enough visitor groups rated the importance of visitor services and facilities to provide reliable results.

- Not enough visitor groups rated the quality of visitor services and facilities to provide reliable results.

Quality of personal interaction with a park ranger

Question 16a
During this visit to James A. Garfield NHS, did you and your personal group have any personal interaction with a park ranger other than on the Home tour?

Results
- 53% of visitor groups had a personal interaction with a park ranger (see Figure 163).

![Figure 163: Visitor groups that had personal interactions with park rangers other than on Home tour](image)

Question 16b
If YES, please rate the quality of your interaction with the park ranger.

Results
- Visitor groups rated park rangers as “very good” or “good” as follows (see Figure 164).
  - 93% Courtesy
  - 92% Helpfulness
  - 92% Quality of information provided
- Figures 165 to 167 show the quality ratings for each interaction.

**Expenditures**

**Total expenditures inside and outside the park**

**Question 20**
For you and your personal group, please estimate all expenditures for the items listed below for this visit to James A. Garfield NHS and the surrounding area (within a 1-hour drive of the park).

**Results**
- 49% of visitor groups spent $1-$25 (see Figure 168).
- 18% spent $51 or more.
- 16% spent $26-$50.
- The average visitor group expenditure was $31.
- The median group expenditure (50% of groups spent more and 50% of groups spent less) was $20.
- Average total expenditure per person (per capita) was $13.
- As shown in Figure 169, the largest proportions of total expenditures inside and outside the park were:
  - 32% All other purchases
  - 29% Restaurants and bars
  - 27% Groceries and takeout food
- There were no expenditures outside the park reported for:
  - Lodges, hotels, motels, cabins, B&B, etc.
  - Camping fees and charges
  - Other transportation expenses

Number of adults covered by expenditures

Question 20c
How many adults (18 years or older) do these expenses cover?

Results
- 73% of visitor groups had two adults covered by expenditures (see Figure 170).
- 20% had one adult.

![Figure 170: Number of adults covered by expenditures](image)

Number of children covered by expenditures

Question 20c
How many children (under 18 years) do these expenses cover?

Results
- 58% of visitor groups had no children covered by expenditures (see Figure 171).
- 34% had one or two children.

![Figure 171: Number of children covered by expenditures](image)

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
Expenditures inside the park

Question 20a
Please list your group’s total expenditures inside James A. Garfield NHS.

Results
- 54% of visitor groups spent $1-$25 inside the park (see Figure 172).
- 31% spent no money.
- The average visitor group expenditure inside the park was $15.
- The median expenditure (50% of groups spent more and 50% of groups spent less) was $15.
- Average total expenditure per person (per capita) was $10.
- As shown in Figure 173, the largest proportions of total expenditures inside the park were:
  - 54% All other purchases
  - 34% Admission, recreation, entertainment fees

Admission, recreation, entertainment fees

Results – Interpret with CAUTION!
- Not enough visitor groups responded to this question to provide reliable results (see Figure 174).

All other purchases (souvenirs, film, books, sporting goods, clothing, etc.)
- 47% of visitor groups spent $1-$25 on other purchases inside the park (see Figure 175).
- 47% spent no money.

Donations

Results – Interpret with CAUTION!
- Not enough visitor groups responded to this question to provide reliable results (see Figure 176).

*total percentages do not equal 100 due to rounding
**total percentages do not equal 100 because visitors could select more than one answer
**Expenditures outside the park**

**Question 20b**
Please list your group’s total expenditures in the surrounding area outside the park (within a 1-hour drive of the park).

**Results**
- 40% of visitor groups spent no money (see Figure 177).
- 32% spent between $1- $25.
- 28% spent $26 or more.
- The average visitor group expenditure outside the park was $24.
- The median expenditure (50% of groups spent more and 50% of groups spent less) was $10.
- Average total expenditure per person (per capita) was $17.
- As shown in Figure 178, the largest proportions of total expenditures outside the park were:
  - 37% Restaurants and bars
  - 34% Groceries and takeout food
  - 18% All other purchases
- There were no expenditures outside the park reported for:
  - Lodges, hotels, motels, cabins, B&B, etc.
  - Camping fees and charges
  - Other transportation expenses
  - Donations

Preferences for future visit

Preferred methods to learn about the park

Question 15
If you were to visit James A. Garfield NHS in the future, how would you and your personal group prefer to learn about cultural and natural history/features of James A. Garfield NHS?

Results
- 95% of visitor groups were interested in learning about cultural and natural history/features on future visits (see Figure 184).
- As shown in Figure 185, the most common preferred methods of learning about the park by visitor groups were:
  - 56% Special events
  - 52% Indoor exhibits
  - 51% Outdoor exhibits
- “Other” method (3%) was:
  Reenactments/living history demonstrations

Appendix 3: Additional Analysis

The Visitor Services Project (VSP) offers the opportunity to learn more from VSP visitor study data through additional analysis. Two-way and three-way cross tabulations can be made with any questions.

Below are some examples of the types of cross tabulations that can be requested. To make a request, please use the contact information below, and include your name, address and phone number in the request.

1. What proportion of family groups with children attend interpretive programs?
2. Is there a correlation between visitors’ ages and their preferred sources of information about the park?
3. Are highly satisfied visitors more likely to return for a future visit?
4. How many international visitors participate in hiking?
5. What ages of visitors would use the park website as a source of information on a future visit?
6. Is there a correlation between visitor groups’ rating of the overall quality of their park experience, and their ratings of individual services and facilities?
7. Do larger visitor groups (e.g., four or more) participate in different activities than smaller groups?
8. Do frequent visitors rate the overall quality of their park experiences differently than less frequent visitors?

Appendix 4: Decision Rules for Checking Non-response Bias

Non-response bias is one of the major threats to the quality of a survey project. It affects the ability to generalize from a sample to general population (Salant and Dillman 1994; Dillman, 2007; Stoop 2004; Filion 1976; Dey 1997). Since non-response bias is usually caused by participants failing to return their questionnaires, a higher response rate is more desirable. However, higher response rates do not guarantee low non-response bias. Researchers have suggested different methods to detect non-response bias. The most common variables used to detect non-response bias are demographic variables. Some researchers such as Van Kenhove (2002), Groves (2000) also suggest that saliency of topic has an effect on response rate. In this visitor study, visitor satisfaction (overall quality rating) could be considered as one of the salient factors as we aim to collect opinions from both unsatisfied and satisfied visitors. There are also several methods for checking non-response bias suggested in the literature. We decided to follow the method suggested by Groves (2006), De Rada (2005), and Rogelberg and Luong (1998) to compare the demographic characteristics as well as satisfaction scores of respondents in three different mailing waves. This seems to be the most suitable method because the visitor population is generally unknown.

Respondents were categorized based on the date their questionnaire was received. The first wave is defined as surveys received before the 1st replacement was mailed, the second wave is between 1st and 2nd replacement and the third wave contains surveys received after the 2nd replacement. Analysis of variance was used to detect differences in age, distance of travel to the park, and overall quality rating scores among different mailing waves.

A Chi-square test was used to detect the difference in education levels at different mailing waves. The hypothesis was that group types are equally represented. If the p-value is greater than 0.05, the difference in group type is judged to be insignificant.

Therefore, the hypotheses for checking non-response bias are:

1. Respondents of different mailing waves had the same average age.
2. On average, respondents of different mailing waves traveled the same distance to the park.
3. Respondents of different mailing waves had the same average satisfaction scores.
4. Respondents of different education levels are equally represented in different mailing waves.

Tables 3 and 4 show no significant difference in age, travel distance, overall quality rating, and level of education. The non-response bias is thus judged to be insignificant.
