

## Executive Summary

This visitor study report profiles a systematic random sample of Grant-Kohrs Ranch National Historic Site (NHS) visitors during July 9 - August 8, 2013. A total of 350 questionnaires were distributed to visitor groups. Of those, 283 questionnaires were returned, resulting in an 80.9% response rate.

<b>Group size and type</b>	Forty-seven percent of visitor groups consisted of two people and 31% were in groups of three or four. Seventy-eight percent of visitor groups consisted of family groups.
<b>State or country of residence</b>	United States visitors were from 44 states and Washington, DC and comprised 91% of total visitation during the survey period, with 26% from Montana. Nine percent of visitor groups were residents of the area (within 50 miles of the park). International visitors were from 12 countries and comprised 9% of total visitation during the survey period with 21% from Germany, 18% from Canada, and 18% from France.
<b>Frequency of visits</b>	For 80% of visitors, this was their first visit, while 13% had visited two or three times.
<b>Age and income level</b>	Forty-one percent of visitors were ages 56-75 years, 20% were 15 years or younger, and 18% were 41-55 years old. Twenty percent of respondents reported an income level of \$50,000-\$74,999.
<b>Information sources</b>	Most visitor groups (89%) obtained information about the park prior to their visit most often through the Grant-Kohrs Ranch NHS website (42%), friends/relatives/word of mouth (30%), and maps/brochures (29%). Most visitor groups (93%) received the information they needed. Sixty-five percent of visitor groups prefer to use the Grant-Kohrs Ranch NHS website to obtain information for a future visit.
<b>Park as destination</b>	During the on-site interview, 67% of visitor groups said the park was one of several destinations and for 27%, the park was their primary destination.
<b>Primary reason for visiting the area</b>	For 26% of visitor groups, visiting the park was the primary reason nonresident group members visited the area.
<b>Transportation</b>	Fifty-one percent of nonresident visitor groups used a car to travel most of the distance from their home to the park area (within 50 miles of the park), and 23% used a SUV/truck/van. Ninety-two percent of visitor groups used one vehicle to arrive at the park.
<b>Overnight stays</b>	Fifty-one percent of visitor groups stayed overnight in the area within 50 miles of the park, of which 77% stayed one or two nights. Forty-eight percent of visitor groups stayed in a lodge, motel, rented condo/home, cabin, or B&B, while 35% were RV camping in a developed campground.
<b>Length of visit</b>	Seventy-seven percent of visitor groups spent two to three hours in the park. The average length of stay was 2.4 hours.
<b>Sites visited</b>	The most common sites visited in the park were Visitor Center (92%), Bunkhouse row (86%), and Ranch house (82%).

## **Executive Summary (continued)**

<b>Activities on this visit</b>	The most common activities were learning about the history of the site (88%), viewing exhibits (87%), and attending ranger-led talks/programs (77%).
<b>Primary purpose of park</b>	The primary purpose of Grant-Kohrs Ranch NHS that most visitor groups selected was to provide understanding of the open range era of the nation's history (68%).
<b>Visitor services and facilities</b>	The visitor services and facilities most often used by visitor groups were visitor center overall (87%), assistance from park staff (77%), and restrooms (73%).
<b>Protecting park resources and attributes</b>	The highest combined proportions of “extremely important” and “very important” ratings of protecting park resources and attributes included historic buildings and resources (96%), clean water (93%), educational opportunities (91%), and ranger-led programs (89%).
<b>Expenditures</b>	The average visitor group expenditure (inside and outside the park within 50 miles of the park) was \$208. The median group expenditure (50% of groups spent more and 50% of groups spent less) was \$75. The average total expenditure per person (per capita) was \$67. Fourteen percent of respondents had forgone income to make this trip.
<b>Overall quality</b>	Most visitor groups (97%) rated the overall quality of facilities, services, and recreational opportunities at Grant-Kohrs Ranch NHS as “very good” or “good.” Less than 1% of groups rated the overall quality as “very poor” or “poor.”
